

SUPPLIER'S DECLARATION

Urns VERSION MARCH - 2024

The Dutch foundation Stichting GreenLeave's goal is to make funerals more sustainable in the Netherlands. To this end, it has researched the sustainability of sections of the funeral, which has led to 10 criteria documents. These were then tested by the Dutch Natuur & Milieu. Based on the criteria, products are selected that all participating funeral companies can offer to their customers under the GreenLeave label.

To be able to include the products in the GreenLeave package, the GreenLeave Foundation asks suppliers to examine the criteria and, if they assume that their product meets them, to fill in the specifications of the product in the form below.

With these criteria, we have tried to provide suppliers and customers with a clear framework for the most sustainable options available today. However, sustainability is not static; the intention is to increase the sustainability of this funeral package even more.

Do you have a product that does not meet the existing criteria but which, in your opinion, is more sustainable than specified in the criteria? Please complete the form below and provide a clear substantiation of the sustainability of your product. You may include attachments with additional information or research.

If you are planning on developing a sustainable product, we will be happy to collaborate with you. You can then also use this form to describe your design, supplemented, for example, with drawings or other documentation.

Scan and send your completed and signed form to info@greenleave.nu. We will let you know, within a few weeks, whether your product can be included in the GreenLeave package.

For any questions or comments, please contact us via the above-mentioned email address.

Thank you for your cooperation. We can only make a sustainable funeral come true together with you as a supplier.

Urns completion form

To be completed by the supplier:

Name of your company

Name of your product

Where to find more information,
 please share your website e.g.

1. Complete the specifications of the urn here below. See the corresponding criteria document for a description of the sustainability criteria.

		What material is used	From which country is the raw material (at least fill in for main material and lining)	Description sustainability features (and/or certificates)
1	Main material			
2	If applicable: lacquer or other finishing agents			
3	Does the product contain any other materials? If yes, describe these			

EXTRA

2. Does the product have extra sustainable value? E.g. the reuse of materials, or do social aspects play a role? If yes, please specify here.

.....
.....
.....

3. Can you indicate whether sustainability (e.g. low energy consumption) has been taken into account in the production process? If yes, please specify here.

.....
.....
.....

4. What ideas and possible plans do you have to make your products more sustainable?

.....
.....
.....

5. Do you have other environmental aspects in addition to the GreenLeave criteria?

.....
.....
.....

6. If you do not currently produce a product that meets these requirements, are you willing and able to do so in the future? If yes, what kinds of urns will this be?

.....
.....
.....

APPENDICES

We would like to receive one or more clear photos of the product.

If you have additional information or research on the sustainability of this funeral urn, please attach it as an appendix.

DECLARATION

The supplier hereby declares that the above has been completed truthfully. If any changes are made to the above, the supplier shall report this to Stichting GreenLeaf.
